

Anovité Face Cream Ingredients

Ingredient:	Info:	EWG+ Rating:
Water		1
Yeast Extract *	Source of beta-glucan, which is a good antioxidant. It duplicates the aesthetics of mammalian collagen while delivering enhanced levels of moisture to the skin or hair without the associated issues of using an animal base product.	1
Sodium PCA	Commonly referred to as the Natural Moisturizing Factor, Sodium PCA occurs naturally in human skin and is responsible for binding moisture to the cells. It is a high-performance humectant that can hold several times its weight in water. It has stronger hydrating power than that of glycerin, sorbitol and propanediol. Natural ingredient that is derived from plants, fruits and coconut oil.	1
Dimethyl Isosorbide	Clear liquid sugar-based solvent that is a great polar solvent for actives. This product stabilizes actives and boost the performance and enhances the delivery of actives within formulations. The ability of these ingredients to penetrate deep layers of the stratum corneum enables effective delivery of actives.	1
Saccharide Isomerate	Ensures instant, deep hydration by generating a moisture reservoir that lasts for 72 hours from the final application. Consumer test panels confirm reduction in flakiness and itchiness caused by dry skin and skin becomes visibly smoother.	1
Potato Starch	Modified Emulsion stabilizer and rheology modifier derived from potato starch. Provides a silky feel after complete rub in.	1
Colostrum	Colostrum is a potent ingredient for any kind of skin soothing, including hydration, reduction of fine lines, sun damage, breakouts, and soothing any skin irritations or imbalances. The growth factors found in Colostrum are natural, not synthesized, and it rejuvenates skin by stimulating cell rejuvenation.	1
Isopropyl Palmitate *	Fast spreading emollient (softening agent) with good spreadability that provides a silky touch to products. Based on palm and palm kernel oil, the substances are known to be well tolerated by the human skin and to have little environmental impact.	1
Prunus Amygdalus Dulcis (Sweet Almond) Oil	Used in cosmetics for its softening and moisturizing properties. It is high in oleic acid and provides excellent conditioning properties for hair and skin.	1
Cetyl Alcohol *	Viscosity enhancer composed of fatty alcohols derived from natural vegetable oils.	1
Glyceryl Stearate Citrate	Made of glycerin and fatty acids derived from vegetable oils and used as an emulsifier and emollient.	1
Squalane	Occurs naturally in the lipidic layers of the skin and prevents moisture loss while restoring the skin's suppleness and flexibility. It has exceptional moisturizing properties and can penetrate the skin. It provides a silky, smooth and luxurious touch, without a greasy, heavy after-feel.	1
Cetearyl Glucoside; Sorbitan Oliviate	These ingredients together form a natural emulsifier used to develop oil-in-water emulsions with soft, light and velvety after- feel.	1
Coco-Caprylate	Naturally based light emollient that spreads very quickly and has a pleasant, dry skin feel.	N/A
Butyrospermum Parkii (Shea) Butter	It is particularly suited for skin formulations that target dry and cracked skin healing; offers protection of the skin against weather, sun and photo-aging and elimination of superficial irritations due to its high content of unsaponifiables.	1

Ingredient:	Info:	EWG+ Rating:
Fucoidan	Active ingredient that is an anti-aging, wrinkle smoothing and cutaneous barrier repair. It stimulates cell communication and then repairs the age-related skin damage. Cosmetically, this product is used in skincare and make-up aimed at preventing and fighting wrinkles.	N/A
Ubiquinone	Coenzyme Q10 is a kind of fat-soluble quinones compound. It can decrease the collagen degradation of the skin and interdict the damage caused by the photo aging. The supplement on the skin can protect the horn cell from the damage of ultraviolet irradiation and promote the multiplication of epidermal cell.	1
Pseudoalteromonas Ferment Extract	Active ingredient with high content in proteins and exopolysaccharides to increase essential extracellular matrix components. It reinforces the structural integrity and flexibility of the skin and boost the epidermal cohesion and barrier function. It restores skin's hydration and natural glow while also protecting skin from digital pollution (blue light).	1
Hydrolyzed Wheat Protein	Provides amino acids & high glutamine levels to skin & hair. Anti-irritant and protective properties are intact making it an ideal ingredient for skin care products. This vegetable derived protein has effective moisture binding capabilities and will help maintain an optimum moisture balance in the skin.	1
Hydrolyzed Soy Protein	It increases the ability of the hair and skin to bind moisture. It is substantive to hair and skin and helps to minimize roughness and chapping of skin caused by dry climates.	1
Tripeptide-10 Citrulline	Ensures uniformity in fibril diameter and increases skin suppleness. Due to its good cohesion of collagen fibres, Tripeptide-10 Citrulline is widely used in anti-aging cosmetic products.	1
Tripeptide-1	Helps prevent damage to collagen.	1
Diheptyl Succinate; Capryloyl Glycerin/Sebacic Acid Copolymer	100% natural and sustainable emollient that has the sensory feel of cyclomethicone and dimethicone. It is ecocertified and readily biodegradable. In natural formulations, it can be used to reduce the greasiness of natural oils.	1
Dimethyl Sulfone *	May reduce oxidative stress and inflammation.	1
Simmondsia Chinensis (Jojoba) Seed Oil	Acts as a moisturizer and emollient agent to improve skin elasticity and suppleness.	1
Rosmarinus Officinalis (Rosemary) Leaf Oil *	Fragrance, can be used as an antioxidant.	1
Tocopheryl Acetate	Proven antioxidant effects, enhances moisturization and strengthens the skin barrier. Helps to counteract the appearance of inflammation linked to oxidative processes.	3
Polyquaternium 10	Derived from natural cellulose. It has antistatic, moisturization and lubrication properties. It can reduce irritation caused by surfactants, recover skin's self-protection, lubricity and leave an elegant after feel.	1
Potassium Sorbate *	Food grade preservative	3
Benzyl Alcohol *	Food grade preservative	2
Sodium Benzoate *	Food grade preservative	1
Lactic Acid *	Naturally occurring alpha hydroxy acid and is an acidity regulator with exfoliating properties. It is a powerful moisturizing, humectant and emollient agent. Derived from plant stocks.	1
	* Designated as safe for general or specific, limited use in food
